## **Multi-Family Dwelling Electric Vehicle Charging Stations**

## Eligibility Checklist for Expedited Permitting Process Multi-Family Dwelling Electric Vehicle Charging Station

This checklist is provided to determine if your application is eligible for expedited EVCS processing. If any item is checked NO, revise design, otherwise application must go through standard review process. If item M or N is not applicable check the N/A box.

Type of Charging Station(s) Proposed	Power Levels (proposed circuit rating)		Quantity of each type	
Level 1	110/120 volt alternating current (VAC) at 15 or 20 Amps			
Level 2 - 3.3 kilowatt (kW) (low)	208/240 VAC at 20 or 30 Amps			
Level 2 – 6.6kW (medium)	208/240 VAC at 40 Amps			
Level 2 – 9.6kW (high)	208/240 VAC at 50 Amps			
Level 2 – 19.2kW (highest)	208/240 VAC at 100 Amps			
Other (provide detail):	Provide rating:			
PERMIT APPLICATION				
	ng information: Project address, parcel #, builder/owner	Υ	-	
name, contractor name, valid contractor's				
Does the application include EVCS manufacture	acturer's specs and installation guidelines	Υ		
LECTRIC LOAD CALCULATION WORKSHE	EET			
C. Is an electrical load calculation worksheet	included? (CEC 220)	Υ		
D. Based on the load calculation worksheet,	a new electrical service panel upgrade is not required	Υ		
. Is the charging circuit appropriately sized f		Υ		
	2 – 9.6 kW station with a circuit rating of 50 Amps or	Υ		
0 0 1 1 1	J 1	I I		
SITE PLAN & SINGLE LINE DRAWING	ctrical calculations included with the single line diagram	V		
SITE PLAN & SINGLE LINE DRAWING  6. Is a site plan and electrical plan with a sing  1) If mechanical ventilation requirements	gle-line diagram included with the permit application are triggered for indoor venting requirements	Y		
GITE PLAN & SINGLE LINE DRAWING  3. Is a site plan and electrical plan with a sing  1) If mechanical ventilation requirements  (CEC 625.52), is a mechanical plan in	gle-line diagram included with the permit application are triggered for indoor venting requirements cluded with the permit application	Υ		
SITE PLAN & SINGLE LINE DRAWING  G. Is a site plan and electrical plan with a sing  1) If mechanical ventilation requirements  (CEC 625.52), is a mechanical plan in  H. Is the site plan fully dimensioned and draw	gle-line diagram included with the permit application are triggered for indoor venting requirements cluded with the permit application on to scale	Y Y		
SITE PLAN & SINGLE LINE DRAWING  6. Is a site plan and electrical plan with a sing 1) If mechanical ventilation requirements (CEC 625.52), is a mechanical plan in 1. Is the site plan fully dimensioned and draw 1) Showing location, size, and use of all signs.	gle-line diagram included with the permit application are triggered for indoor venting requirements cluded with the permit application on to scale structures	Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  G. Is a site plan and electrical plan with a sing  1) If mechanical ventilation requirements  (CEC 625.52), is a mechanical plan in  H. Is the site plan fully dimensioned and draw	gle-line diagram included with the permit application are triggered for indoor venting requirements cluded with the permit application in to scale structures charging system	Y Y		
SITE PLAN & SINGLE LINE DRAWING  3. Is a site plan and electrical plan with a sing  1) If mechanical ventilation requirements (CEC 625.52), is a mechanical plan in  1. Is the site plan fully dimensioned and draw  1) Showing location, size, and use of all section of electrical panel to  2) Showing location of electrical panel to  3) Showing type of charging system and	gle-line diagram included with the permit application are triggered for indoor venting requirements cluded with the permit application on to scale structures charging system mounting	Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  5. Is a site plan and electrical plan with a sing 1) If mechanical ventilation requirements (CEC 625.52), is a mechanical plan in 1. Is the site plan fully dimensioned and draw 1) Showing location, size, and use of all s 2) Showing location of electrical panel to	gle-line diagram included with the permit application are triggered for indoor venting requirements included with the permit application of the scale structures charging system mounting  TRCIAL CODE (TITLE 24, PART 3)	Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  5. Is a site plan and electrical plan with a sing 1) If mechanical ventilation requirements (CEC 625.52), is a mechanical plan in 1. Is the site plan fully dimensioned and draw 1) Showing location, size, and use of all s 2) Showing location of electrical panel to 3) Showing type of charging system and  OMPLIANCE WITH 2022 CALIFORNIA ELEC  Does the plan include EVCS manufacturer's	gle-line diagram included with the permit application are triggered for indoor venting requirements icluded with the permit application in to scale structures charging system mounting  TRCIAL CODE (TITLE 24, PART 3) a specs and installation guidelines	Y Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  5. Is a site plan and electrical plan with a sing 1) If mechanical ventilation requirements (CEC 625.52), is a mechanical plan in 1. Is the site plan fully dimensioned and draw 1) Showing location, size, and use of all s 2) Showing location of electrical panel to 3) Showing type of charging system and  OMPLIANCE WITH 2022 CALIFORNIA ELEC  Does the plan include EVCS manufacturer's	gle-line diagram included with the permit application are triggered for indoor venting requirements cluded with the permit application in to scale structures charging system mounting  TRCIAL CODE (TITLE 24, PART 3) as specs and installation guidelines age and location of existing electrical service panel	Y Y Y Y Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  6. Is a site plan and electrical plan with a sing 1) If mechanical ventilation requirements (CEC 625.52), is a mechanical plan in 1. Is the site plan fully dimensioned and draw 1) Showing location, size, and use of all s 2) Showing location of electrical panel to 3) Showing type of charging system and  1) Does the plan include EVCS manufacturer's 1. Does the electrical plan identify the ampera 1) If yes, does the existing panel schedul 3. Is the charging unit rated more than 60 am	gle-line diagram included with the permit application are triggered for indoor venting requirements cluded with the permit application in to scale structures charging system mounting  TRCIAL CODE (TITLE 24, PART 3) a specs and installation guidelines age and location of existing electrical service panel le show room for additional breakers aps or more than 150V to ground	Y Y Y Y Y Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  3. Is a site plan and electrical plan with a sing (CEC 625.52), is a mechanical plan in the site plan fully dimensioned and draw 1) Showing location, size, and use of all site 2) Showing location of electrical panel to 3) Showing type of charging system and 1) Showing type of charging system and 1) Does the plan include EVCS manufacturer's 1. Does the electrical plan identify the ampera 1) If yes, does the existing panel schedul (C. Is the charging unit rated more than 60 am 1) If yes, are disconnecting means provide within 50' of EVCS. (CEC 625.43)	gle-line diagram included with the permit application are triggered for indoor venting requirements included with the permit application on to scale structures charging system mounting  TRCIAL CODE (TITLE 24, PART 3)  See specs and installation guidelines age and location of existing electrical service panel lee show room for additional breakers aps or more than 150V to ground led in a readily accessible location in line of site and	Y Y Y Y Y Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  3. Is a site plan and electrical plan with a sing (CEC 625.52), is a mechanical plan in the site plan fully dimensioned and draw 1) Showing location, size, and use of all site 2) Showing location of electrical panel to 3) Showing type of charging system and 1) Showing type of charging system and 1) Does the plan include EVCS manufacturer's 1. Does the electrical plan identify the ampera 1) If yes, does the existing panel schedul (C. Is the charging unit rated more than 60 am 1) If yes, are disconnecting means provide within 50' of EVCS. (CEC 625.43)	gle-line diagram included with the permit application are triggered for indoor venting requirements included with the permit application on to scale structures charging system mounting  FRCIAL CODE (TITLE 24, PART 3)  Is specs and installation guidelines age and location of existing electrical service panel less how room for additional breakers aps or more than 150V to ground led in a readily accessible location in line of site and smally Recognized Testing Laboratory (NRTL)	Y Y Y Y Y Y Y Y Y Y Y Y Y Y Y Y Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  Description  B. Is a site plan and electrical plan with a sing an information of the site plan fully dimensioned and draw and sing and plan information. It is the site plan fully dimensioned and draw and sing and	gle-line diagram included with the permit application are triggered for indoor venting requirements icluded with the permit application on to scale structures charging system mounting  TRCIAL CODE (TITLE 24, PART 3) as specs and installation guidelines age and location of existing electrical service panel lee show room for additional breakers aps or more than 150V to ground led in a readily accessible location in line of site and smally Recognized Testing Laboratory (NRTL)	Y Y Y Y Y Y Y		
SITE PLAN & SINGLE LINE DRAWING  Description  B. Is a site plan and electrical plan with a sing an information of the site plan fully dimensioned and draw and sing and plan information. It is the site plan fully dimensioned and draw and sing and	gle-line diagram included with the permit application are triggered for indoor venting requirements included with the permit application on to scale structures charging system mounting  TRCIAL CODE (TITLE 24, PART 3)  Is specs and installation guidelines age and location of existing electrical service panel are show room for additional breakers aps or more than 150V to ground and ded in a readily accessible location in line of site and smally Recognized Testing Laboratory (NRTL)	Y Y Y Y Y Y Y Y Y Y Y Y Y Y Y		

## COMPLIANCE WITH 2022 MANDATORY CALGREEN CODE FOR NEW CONSTRUCTION

N.	Do CAL Green EV Readiness installation requirements apply to this project	A Y	N
	1) Should be identified during plan review. (5.106.5.3.3)	Υ	N
	2) Do the plans demonstrate conformance with mandatory measures for 3% of total parking spaces in lots with 51+ must be EV capable	Υ	N
