As an authorized representative of the applicant, I hereby consent to and acknowledge by my signature below, that I understand the following:

The service of processing an application for development of property in the City of Jurupa Valley is of primary benefit to the applicant. The cost of processing an application is charged according to the hours spent by staff in reviewing and analyzing the project, including checking plans, writing staff reports, preparing environmental analyses, notifying and responding to the public and attending public hearings. The applicant receiving benefit from the service shall pay the cost of these services. Total costs varies according to the project's size and complexity. At the City's sole discretion, a consultant may process the application. Pursuant to the City Council Resolution, the applicant will pay all costs for staff and consultant services of any applicable "in-house" administrative costs. Costs for project specific expenditures, such as postage for mailing public notices, newspaper notices, etc., will be billed "at cost" to deposit.

This deposit creates an account to which City staff processing time is charged. Case processing charges will automatically be drawn against the deposit funds until the minimum (20%) balance remains. All charges will be shown on a monthly statement, including a description of services rendered and provided to the applicant. If the amount of staff time required to complete project processing will exceed the available deposit balance, you will be billed for additional deposit funds in advance. If payment is not received in seven (7) working days after the invoice due date, all development activities will be suspended until payment is received. Sixty (60) days after the conclusion of project processing, and after full payment of all invoices is received, any remaining deposit amounts will be refunded.
