Re: Request for Meeting Regarding the Riverside Transmission Reliability Project proceeding (A1504013)

Dear Commissioner Randolph:

The City of Jurupa Valley (City), as a party in the Riverside Transmission Reliability Project (RTRP) proceeding (A1504013), would like to request a meeting with you at the soonest possible day and time of your convenience to discuss the status of the proceeding. This proceeding continues to be delayed by the City of Riverside and Southern California Edison, and has resulted in significant economic damage to the property owners in the proposed overhead route, and the City itself. We would like to discuss the status of the proceeding, our concerns with the proposed overhead alignment, and what we consider as a win-win solution utilizing an undergrounding alternative that will accommodate all parties' needs.

We would like to offer any day and time the week of November 13th, and the first 3 days the week of November 20th. If any of those days do not work for you, we can look at any earliest convenience for you in December.

My contact information is (951) 332-6464 or gthompson@jurupavalley.org

Sincerely,

Gary Thompson,
City Manager
City of Jurupa Valley

Re: In the Matter of the Application of SOUTHERN CALIFORNIA EDISON COMPANY for a Certificate of Public Convenience and Necessity for the Riverside Transmission Reliability Project. (U 338-E); A.15-04-013

Dear Commissioner Randolph and Ms. Peterson:

Thank you again for spending time with us on January 17th to discuss the RTRP and its potential impact on the City of Jurupa Valley and environs. We understand the challenges you must face in having to ultimately decide what, where, and how the RTRP will be implemented, taking into consideration all the monetary, environmental, and other factors.

As we discussed, we would be most honored and pleased to coordinate a trip down to Southern California for you to visit the areas that will be affected by the RTRP. We believe a ground-level tour is the only way for you to have a visceral understanding of the many issues raised by this proposed project. Such a tour would, of course, be conducted under all protocols and safeguards required by the CPUC, Rules of Practice and Procedure, and any other applicable rules and regulations.

Please do not hesitate to contact me if you would like to discuss the logistics of such a tour.

Sincerely,

Gary Thompson
City Manager
